

We drive industry

TECHNOLOGY

Our Commissioning and Service engineers continue to enrich their technical expertise with technology advances through assignments in process simulation, continuing education in the factory classroom, and mentorship with experienced engineers. Areas of technical expertise include:

- AC drives
- DC drives
- AC motors
- DC motors
- HMI
- Sequencing
- Transformers
- Switchgear
- Gauges
- PLC/Controllers
- Sensors
- I/O devices
- Communication protocols
- Level I, II and III Control
- Computer automation
- Process knowledge
- Power systems
- Analog & Digital Control
- Operator Interface
- Local Area Networks
